

Student Reinstatement Questionnaire

The following questions have been designed to facilitate the reinstatement evaluation process after taking a medical leave. Please complete the following questions and return to the Counseling Center before scheduling your reinstatement interviews. You may want to share and discuss these questions with your therapists as well. If you have any questions you should feel free to contact the Counseling Center. (Please feel free to use more paper if necessary.)

1) How do you understand the reasons that necessitated your taking a medical leave of absence from the University?

2) What have you learned about your self from therapy and other experiences during your leave that will enable you to function more successfully in school both personally and academically?

3) Should you be reinstated to the University what plans will you make to prevent reoccurrences of your previous difficulties? What would allow you to cope successfully should you have a relapse?

4) Do you currently have Health Insurance that includes mental health coverage? Provide the name of your insurance carrier. Will you continue to have insurance that covers mental health if you are re-enrolled as a student? Describe your mental health insurance coverage (are you covered for hospitalization, inpatient care, outpatient care, and medication?) If you do not have Health Insurance that includes mental health coverage how will you pay for mental health care if you are required to receive treatment off campus? How would you pay for any medication required?
