

THIRD PARTY ORGANIZATION

SUMMER RESIDENTIAL PROGRAM COVID-19 GUIDELINES

Updated 4/14/22

The following are University COVID-19 guidelines required for all Third-Party Organizations hosting a summer residential program on the Homewood Campus.

- There are currently no capacity limits on indoor events or in-person dining, beyond Fire Code capacity, but participants in such events and dining should be appropriately, socially distanced when possible.

Vaccination

- Guests must be compliant with the current (April 2022) JHU vaccination policy as of the first day of their summer program:
 - **COVID-19 vaccination and either the Pfizer or Moderna COVID booster shot is required. Johnson and Johnson is **NOT** an accepted booster shot with the University.**
 - International guests who have received a vaccine authorized by the World Health Organization but not one authorized by the U.S. Food and Drug Administration, must have one booster dose (either Pfizer or Moderna).
- Children under the age of 5 who are not eligible to be vaccinated are not permitted into University facilities which includes on move-in days to the residential facilities. Any parents or family members on move-in day must follow the vaccination and masking policy.

Testing

- All guests must have a negative COVID test before starting the program. The test should be conducted before arriving on campus and students who are COVID positive should notify their program and not travel. Either a rapid antigen test (not more than 24 hours beforehand) or a PCR test (not more than 72 hours beforehand) is acceptable.
- Asymptomatic guests who are unvaccinated must test twice per week throughout their program.
- Generally, asymptomatic vaccinated guests will be exempt from regular surveillance testing.

Isolation

- Covid-positive residential program participants are expected to leave campus within **24 hours**.
- Those who are fully vaccinated who have had a close contact with someone who tested positive do not need to quarantine. Close contact is defined as 15 or more continuous minutes of contact within 6-foot distance and unmasked.

Masking

- Guests will follow the university masking guidelines that are in place at the time of the session.
- **If you choose to wear a mask**, the most effective types of face coverings are:
 - N95 masks
 - KN95 masks
 - KF94 masks
 - A combination of a cloth mask with a surgical mask
- **If you have an approved vaccination exception**, masks are still required and one of the above options must be used.

All guests and visitors on the Homewood campus are expected to follow all University COVID-19 guidelines as they apply.

If you have additional questions around COVID-19 guidelines as they relate to your residential program on campus this summer, please reach out directly to Kerby Nelson, kerby@jhu.edu.
